

## **Allied Financial Software Knowledgebase**

### **Act4Advisors Support - How to Sync ACT! with my Blackberry**

We highly recommend two addon programs for syncing ACT! to the Blackberry.

#### 1. CompanionLink Express or Professional

CL gives you the ability to sync data from your ACT! database to the existing software on your Blackberry. Data can be synced via a USB cable (Express version \$50) or wirelessly via the internet, (Professional \$100 plus \$10/ mo). CL gives you free support and free upgrades.

#### 2. Handheld Contact

HHC installs a separate ACT! application on the Blackberry and synchronizes data from ACT! wirelessly. Prices start at \$60 per year for the basic and \$240 per year for the professional. Telephone support is \$99 per year additional.

Note: Allied Financial Software does not support synchronization of PDAs or database sync.
